NOTE 1 – NATURE OF OPERATIONS

Alvopetro Energy Ltd. ("Alvopetro" or "the Company") is engaged in the exploration for, and the acquisition, development and production of, hydrocarbons in Brazil and Canada. Alvopetro is incorporated under the Business Corporations Act (Alberta) and is a publicly traded company listed on the TSX Venture Exchange (TSX: ALV.V) and is also traded on the OTCQX® Best Market in the United States (OTCQX: ALVOF).

The Company's head office and records are located at 401, 255 – 17th Avenue SW, Calgary, Alberta, Canada, T2S 2T8.

NOTE 2 – BASIS OF PREPARATION

Basis of Measurement and Statement of Compliance

The interim condensed consolidated financial statements as at September 30, 2026 and for the three and nine months ended September 30, 2026 and September 30, 2025 have been prepared in accordance with IFRS Accounting Standards ("IFRS") applicable to the presentation of interim financial statements, including International Accounting Standard ("IAS") 34 *Interim Financial Reporting*. These interim condensed consolidated financial statements are prepared using the same accounting policies and methods of computation as disclosed in the audited consolidated financial statements as at and for the year ended December 31, 2025, except as noted below. These statements do not contain all disclosures required for full annual financial statements and should be read in conjunction with the audited consolidated financial statements as at and for the year ended December 31, 2025.

In 2026, the Company adopted the new classification and measurement requirements in IFRS 9 *Financial Instruments*. The amendments had no material effect on the amounts recorded in the financial statements.

The interim condensed consolidated financial statements are presented in U.S dollars ("USD").

These interim condensed consolidated financial statements were authorized for issuance by the Company's Board of Directors on November 5, 2026.

Accounting Standards Issued but Not Yet Adopted

IFRS 18 *Presentation and Disclosure in Financial Statements*, was issued in April 2024 to replace IAS 1 *Presentation of Financial Statements*. It requires more consistency and structure for the statement of comprehensive income with the intention of improving transparency and comparability among entities. It is effective for annual periods beginning on or after January 1, 2027 and is to be applied retroactively. While the revised standard will not impact the recognition and measurement of items included in the statement of comprehensive income, it will change the presentation. The impacts of IFRS 18 on Alvopetro will include (but are not limited to):

- the statement of comprehensive income will include three categories: operating, investing and financing;
- revised presentation for the statement of cash flows; and
- new note disclosures for management performance measures.

Management is currently evaluating the full impact on the Company's consolidated financial statements and accompanying notes.

Use of Judgments, Estimates and Assumptions

The timely preparation of the interim condensed consolidated financial statements requires management to make estimates, judgments and assumptions that may affect the reported amounts of assets and liabilities, disclosures of contingencies and the reported amounts of expenses during the period. Details on these estimates, judgments and assumptions are included in the audited consolidated financial statements as at and for the year ended December 31, 2025. Actual results may differ from estimated amounts and those differences may be material.

Under the terms of the Unit Operating Agreement (the "UOA") with respect to Alvopetro's interest in the unitized area, which includes its Caburé natural gas field (the "Unit"), the working interest assigned to each party is subject to redeterminations. The

first redetermination was completed in 2024, whereby Alvopetro was successful, resulting in an increase in its working interest from 49.1% to 56.2%, however this decision was disputed by Alvopetro's partner. An emergency arbitration process granted Alvopetro the redetermined interest effective June 1, 2024; provisional and contingent until reviewed by an arbitral tribunal (the "Tribunal") pursuant to the Rules of Arbitration of the International Chamber of Commerce ("ICC"). On April 27, 2026, Alvopetro was notified that the Tribunal found in favour of Alvopetro, stating that the decision of the independent expert in the redetermination process is final, valid, and effective, definitively binding the Parties, pursuant to the UOA and maintaining Alvopetro's 56.2% working interest in the Unit. The Tribunal also determined that the disputing partner shall reimburse Alvopetro for 90% of costs incurred with respect to the proceeding. As such, Alvopetro recorded a $0.1 million recovery in general and administrative expenses for the nine months ended September 30, 2026. This represents the estimated, inflated costs recovered less the success fee owing to Alvopetro's legal counsel. Alvopetro's working interest in the Unit remains subject to future redeterminations which may have a material impact to Alvopetro.

As initially reported in the interim condensed consolidated financial statements for the three months ended March 31, 2025, Alvopetro recognized an incremental dispute-related royalty expense for the period July 2020 to March 31, 2025, along with associated finance expenses. The dispute was filed by gross overriding royalty ("GORR") holders regarding the Company's computation of the natural gas GORR for Block 197. There was no provision for this dispute prior to March 31, 2025 as Alvopetro had expected to successfully defend its position. However, the dispute resolution procedures advanced the matter to arbitration under the rules of the ICC and in April 2025 the arbitral tribunal agreed with the GORR holders that Alvopetro is required to use a different sales price in the royalty computation. The final calculation has not yet been determined and the amount recorded by Alvopetro to September 30, 2026 represents management's best estimate, however the actual amount determined by the tribunal may be materially different. In addition, the timing of this decision is uncertain and with the GORR award subject to inflation and interest adjustments, the balance owing will increase with the passage of time.

NOTE 3 – SEGMENTED INFORMATION

As at September 30, 2026 Alvopetro had two reportable operating segments which are consistent with the Company's geographic organization: 1) exploration, development and production assets in Brazil; and 2) development and production assets in Canada.

During the year ended December 31, 2025, Alvopetro entered into an assignment agreement ("the Assignment Agreement") to dispose of its interests in the Bom Lugar and Mãe-da-lua oil fields in Brazil. In 2026 certain terms of the Assignment Agreement were amended, some of which impacted estimated amounts including interim period adjustments and the expected timing of receipt of deferred consideration. The carrying value of the assets held for sale was adjusted accordingly and the balance at September 30, 2026 represents the estimated recoverable amount of the asset.

During the year ended December 31, 2025 the Company's wholly-owned subsidiary in Brazil entered into a $20 million loan agreement (the "Loan") with an international branch of a Brazilian chartered financial institution. In connection with the Loan, the Company's Brazilian subsidiary entered into a standby letter of credit with the Brazil chartered financial institution to guarantee the obligations under the Loan. The Loan is also guaranteed by Alvopetro's parent company. The Loan matures on November 29, 2027 with quarterly repayments of $4 million scheduled to commence on November 30, 2026. The Loan bears interest at a fixed rate of 7% per annum (including all applicable charges), payable quarterly.

Under the terms of the Loan agreement, Alvopetro is subject to certain customary financial and non-financial covenants, standard representations and warranties, and events of default. All financial covenants are with respect to the distribution of dividends as follows:

1) the total amount of dividends declared by Alvopetro in the four fiscal quarters immediately preceding the date of declaration of such dividend, does not exceed the Adjusted Cash Flow from Operations for the same period where Adjusted Cash Flow from Operations is defined as Cash Flow from Operating Activities calculated on a consolidated basis, before changes in non-cash working capital, less the total of all interest accrued during the period and principal payments due under the Loan during the same period; and
2) on a consolidated basis, Alvopetro Energy Ltd. maintains a minimum cash or cash equivalents balance of $3.0 million on the closing date of the fiscal quarter immediately preceding the declaration of such dividend.

The Company was in compliance with all financial and non-financial covenants with respect to dividends declared in 2026 and is in compliance with all loan covenants at September 30, 2026. There are no facts or circumstances which indicate to management that the Company will not comply with the debt covenants in the twelve months following the date of these financial statements.

NOTE 9 – DECOMMISSIONING LIABILITIES

Decommissioning liabilities are estimated based on the net ownership interest of wells, facilities and pipelines, management's estimates of costs to abandon and reclaim those wells and infrastructure, and the potential future timing of the costs to be incurred.

c) Restricted Share Units and Deferred Share Units

Alvopetro has a share-based compensation plan whereby the Company may grant Restricted Share Units ("RSUs"), Deferred Share Units ("DSUs") and performance share units ("PSUs") to purchase common shares of the Company.

	Number of RSUs & DSUs
Balance as at December 31, 2024	1,236,580
Granted	80,551
Exercised	(350,631)
Forfeited	(21,549)

Balance at September 30, 2026	**1,015,799**
Percentage of common shares outstanding	**2.7%**
Weighted average remaining contractual life (years)	**3.6**

d) Share-Based Compensation

The fair value of the RSUs and DSUs is estimated based on the share price on the grant date. The fair value of the stock options is estimated on the grant date using the Black-Scholes option pricing model. Weighted average assumptions and resultant fair values for stock options granted were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2026	2025	**2026**	2025

Forfeiture rate (%)	**7.5**	7.5	**7.5**	7.5
Weighted average fair value (CAD$)	**1.48**	0.59	**1.40**	0.51

Share-based compensation that was directly related to exploration and evaluation assets and property, plant and equipment has been capitalized with the remainder recognized as share-based compensation expense on the consolidated statements of operations and comprehensive income.

e) Net Income Per Share

Net income per share is calculated by dividing net income by the weighted average number of common shares outstanding during the applicable period. The following reconciles the number of shares used in the basic and diluted net earnings per share calculations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2026	2025	**2026**	2025

NOTE 13 – CAPITAL MANAGEMENT

The Company's capital consists of the following:

	As at	
	September 30, 2026	December 31, 2025
Cash and cash equivalents	**32,628**	32,372
Working capital[(1)] deficit, excluding cash and cash equivalents	**(30,111)**	(13,922)

Lease liabilities – non-current	**(6,956)**	(5,782)
Shareholders' equity	**112,387**	95,374

(1) Working capital is calculated as total current assets less total current liabilities.

Alvopetro has the ability to adjust its capital structure by issuing new equity or debt and making adjustments to its dividend and capital programs to the extent the capital expenditures are not committed. There are no external restrictions on how the Company manages its capital other than with respect to compliance with the terms of the Loan agreement (Note 8).

NOTE 14 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Foreign Currency Risk

Alvopetro's gas sales agreement is exposed to fluctuations in the USD to the BRL as the natural gas price, although benchmarked to USD, is set quarterly in BRL (based on historical foreign exchange rates) and billed monthly in the set BRL price until the next price redetermination. The following table denotes the overall impact on natural gas revenues of a 5% and 10% appreciation and depreciation of the BRL relative to the USD:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2026	2025	**2026**	2025
Increase (decrease) to natural gas revenues from:				
5% Appreciation of BRL to USD	**885**	713	**2,536**	2,157
10% Appreciation of BRL to USD	**1,869**	1,505	**5,353**	4,553
5% Depreciation of BRL to USD	**(801)**	(645)	**(2,294)**	(1,951)
10% Depreciation of BRL to USD	**(1,529)**	(1,231)	**(4,380)**	(3,725)

Management closely monitors foreign exchange rates and will determine the currency and location of cash held based on funding needs and opportunities to optimize on foreign currency and local interest rates. The following financial instruments are denominated in currencies other than the USD:

	As at			
	September 30, 2026		December 31, 2025	
	CAD$ (000's)	**BRL (000's)**	CAD$ (000's)	BRL (000's)

Net exposure in foreign currency	**1,217**	**58,462**	(5,255)	49,635
Net exposure in USD ($000s)	**858**	**11,284**	(3,834)	9,021

Fair Value of Financial Instruments

Given the short term to maturity of the Company's current financial assets and liabilities the carrying values approximate their fair values.
